Solhaven Community Power, Inc.

Regulation CF offering on StartEngine · Colorado · Form C: May 14, 2026 · Report generated July 19, 2026, 2:41 PM ET · Devin's Impact Pick of the Week

IMPACT-WEIGHTED SCORE

7.4/10

A credible community-solar operator with real impact — and real capitalization risk.

Solhaven pairs a proven team with a genuinely underserved market. The web-verified track record and community ownership model earn high impact marks; a thin minimum raise and aggressive revenue projections temper the overall score.

STRENGTHS

- Founder's prior solar co-op verified at 40+ installations
- Clear community-ownership structure
- Serves low-income housing directly

CAUTIONS

- $50k minimum raise won't fund the stated plan
- 2027 revenue projection lacks support
- One unverifiable certification claim

SECTION SCORES & ANALYSIS

Social impact 9.0

Solar installations owned by mobile-home-park residents in three verified low-income Colorado communities, with a measurable energy-cost reduction model. Location qualifies under high-unemployment county criteria. [1] [2] [4]

Management 7.5

The CEO's prior co-op scaled to 40+ installations, verified via news coverage and state filings. No litigation found. The bench is thin below the founder — a single-person dependency risk. [3] [5] [6]

Deal terms 6.8

Crowd SAFE with an $8M valuation cap and no discount. The cap sits above comparable community-solar raises identified in research; StartEngine fees are standard. Minimum investment $250. [1] [7]

Prospects — 7.2

Two years of audited revenue with 60% year-over-year growth; the 2027 projection assumes a 4x jump that management does not substantiate. Two named competitors are better capitalized. [1] [8] [9]

Risks — 6.5

The $50,000 minimum raise would not cover the equipment plan described in the filing — a capitalization gap the offering does not address. Policy exposure to net-metering changes is noted in the filing and confirmed by current state-level reporting. [1] [10]

VERIFIED CLAIMS

Our founder previously scaled a solar co-op to 40 communities.	CONFIRMED	Matches 2024 press coverage and Colorado SOS records.
$1.2M in annual recurring revenue as of Q1 2026.	INCONCLUSIVE	Consistent with the filed financials' trajectory, but no independent public source exists.
Solhaven is a Certified B Corporation.	CONTRADICTED	Not found in the official B Corp directory as of the report date.
